

Open Code and Data

Thursday, April 4, 2024 9:00 AM (3h 30m)

Research is based on reproducibility and an incremental improvement process. Open Science movement has been developed to facilitate this work and relies on 3 legs: open access to publications, open data and libre software.

Topics :

- open data
- their organization, the conditions of their publication and their reuse
- their valorization
- Free/libre software
- the software licences,
- their valorization,
- data management plan (DMP)
- the associated tools
- their lifecycle,

Presenter: Dr GAURON, Philippe (IJCLab/CNRS-Université Paris-Sud)
