

# The Argus Array

Low- Cost Access to the  
Deep, High-Cadence Sky

**Hank Corbett**, Survey Scientist  
16 September 2024

3rd Astro-COLIBRI  
Multi-Messenger  
Astrophysics Workshop

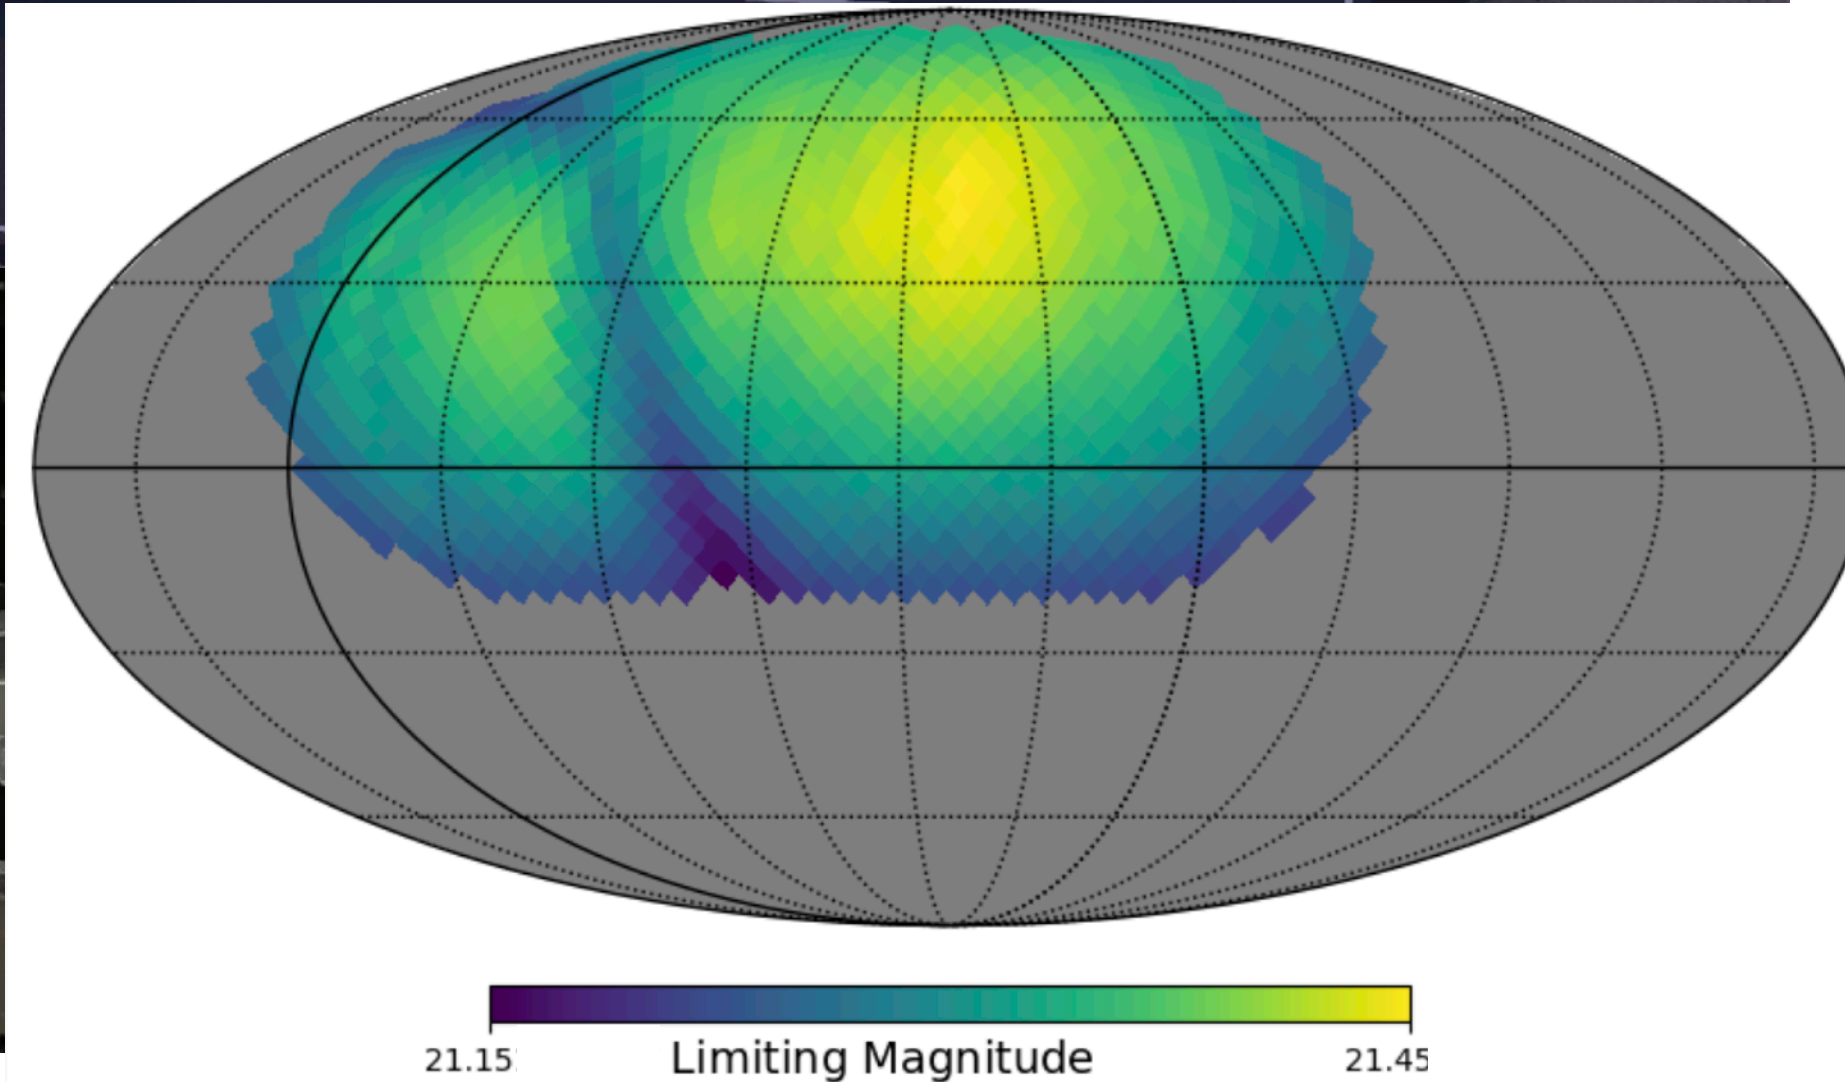

THE UNIVERSITY  
*of* NORTH CAROLINA  
*at* CHAPEL HILL

# The Argus Optical Array

Argus Array 

**Multi-Band** Optical Survey

**5m**-class collecting area

**55 GPix** mosaic camera

**8,000 sq. deg.** FoV

**1.4 arcsec** per pixel

**$m_g \sim 16.1$**  every second  
or

**$m_g \sim 19.6$**  every minute

↪  **$m_g \sim 23.6$**  every week

**4.3 PB** per night

(only 145 TB at 30s cadence)

# The Argus Optical Array

**5m**-class collecting area  
**55 GPix** mosaic camera  
**7,916 sq. deg.** FoV  
**1.4 arcsec** per pixel

**Fully funded for construction!**

First light in ~2027

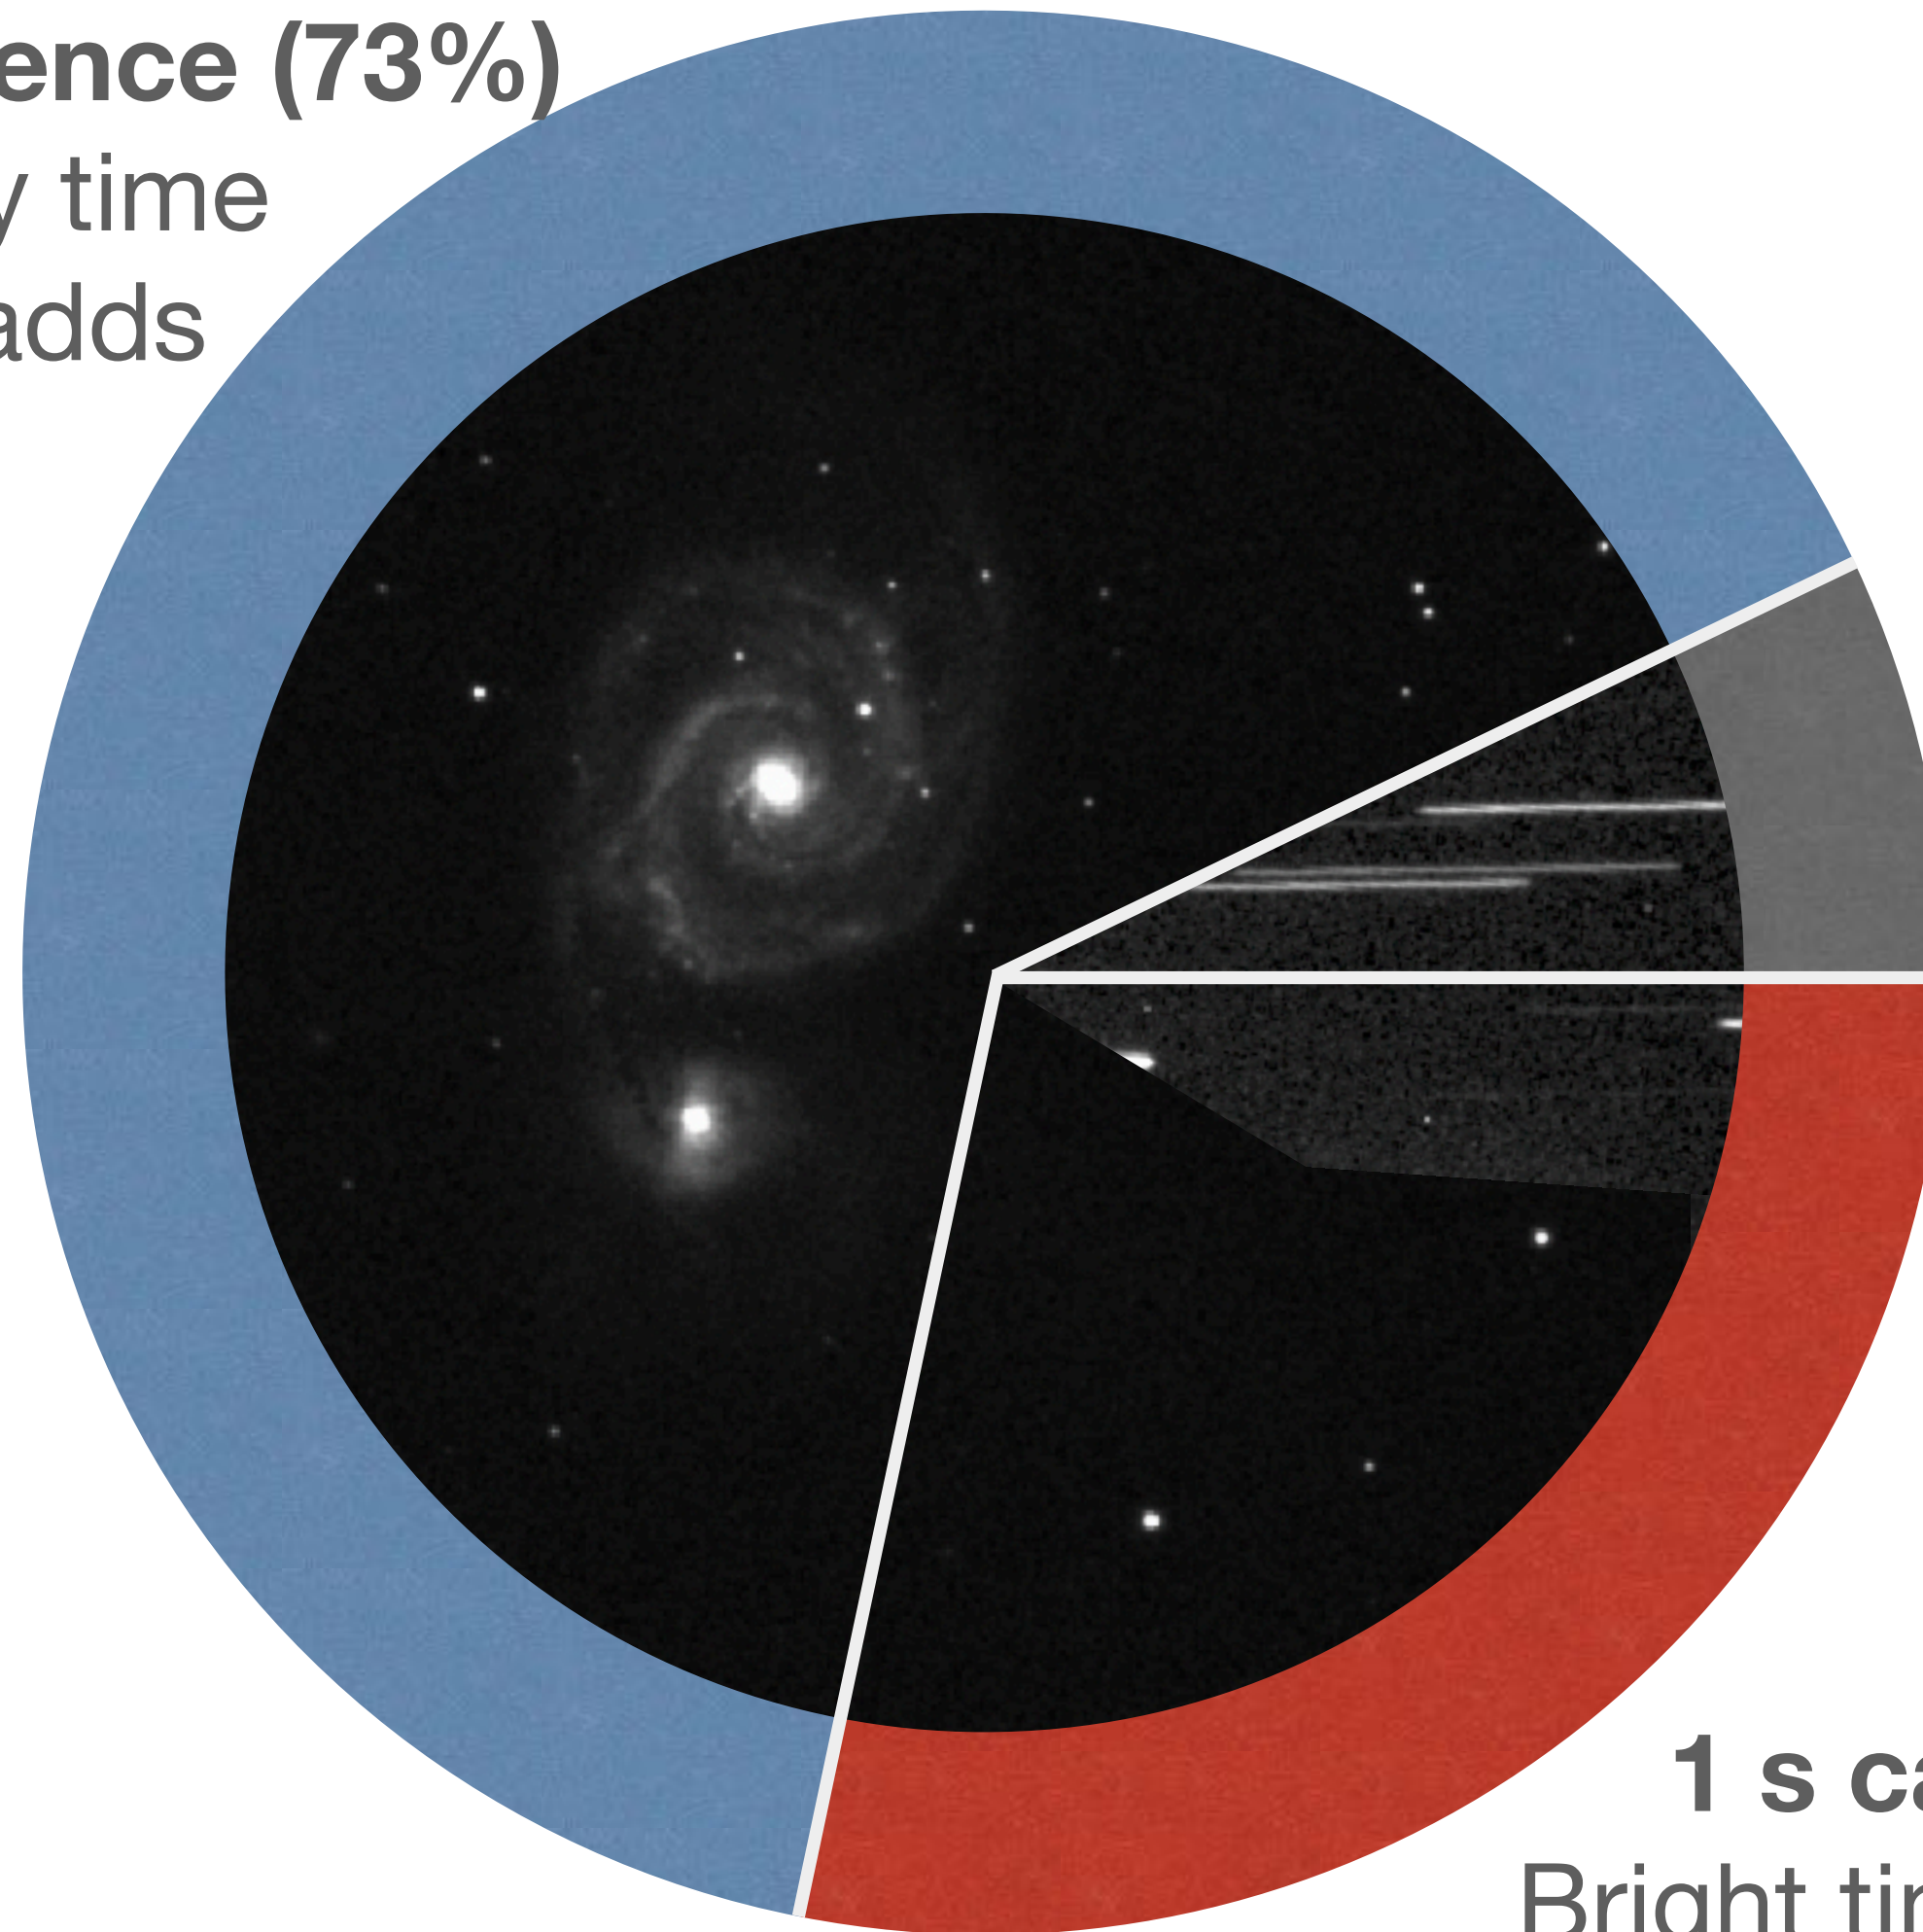

# Observing Strategy

**30 s cadence (73%)**

Dark/grey time  
Deep coadds

**10 ms  
cadence  
(7%)**

**1 s cadence (20%)**  
Bright time

All-sky FoV means  $\sim 1$   
pointing is observable

Exposure time set to  
background limit in dark time  
( $\sim 30$  s)

High-speed mode in bright  
time (1s)

Anti-sidereal exposures  
during slew back for 10 ms  
sensitivity ( $m_g \sim 10$ , depending  
on duty cycle)

# Observing Strategy

15-minutes per filter  
alternating coverage

SDSS **g**

Argus A: **u + g + r**

Up to 1000 deg<sup>2</sup>  
simultaneous multiband

Three color?  
**g\***, **r\***, **i\***

# Phased Prototyping of the Argus Array

**Evryscope  
South**  
24x 61cm  
DSLR lenses

**Argus Pathfinder**  
38x Planewave Argus-8  
Commissioning

**Argus  
Technology  
Demonstrator**

9x Celestron  
RASA8

15-minute "ratchets"  
~45 per night

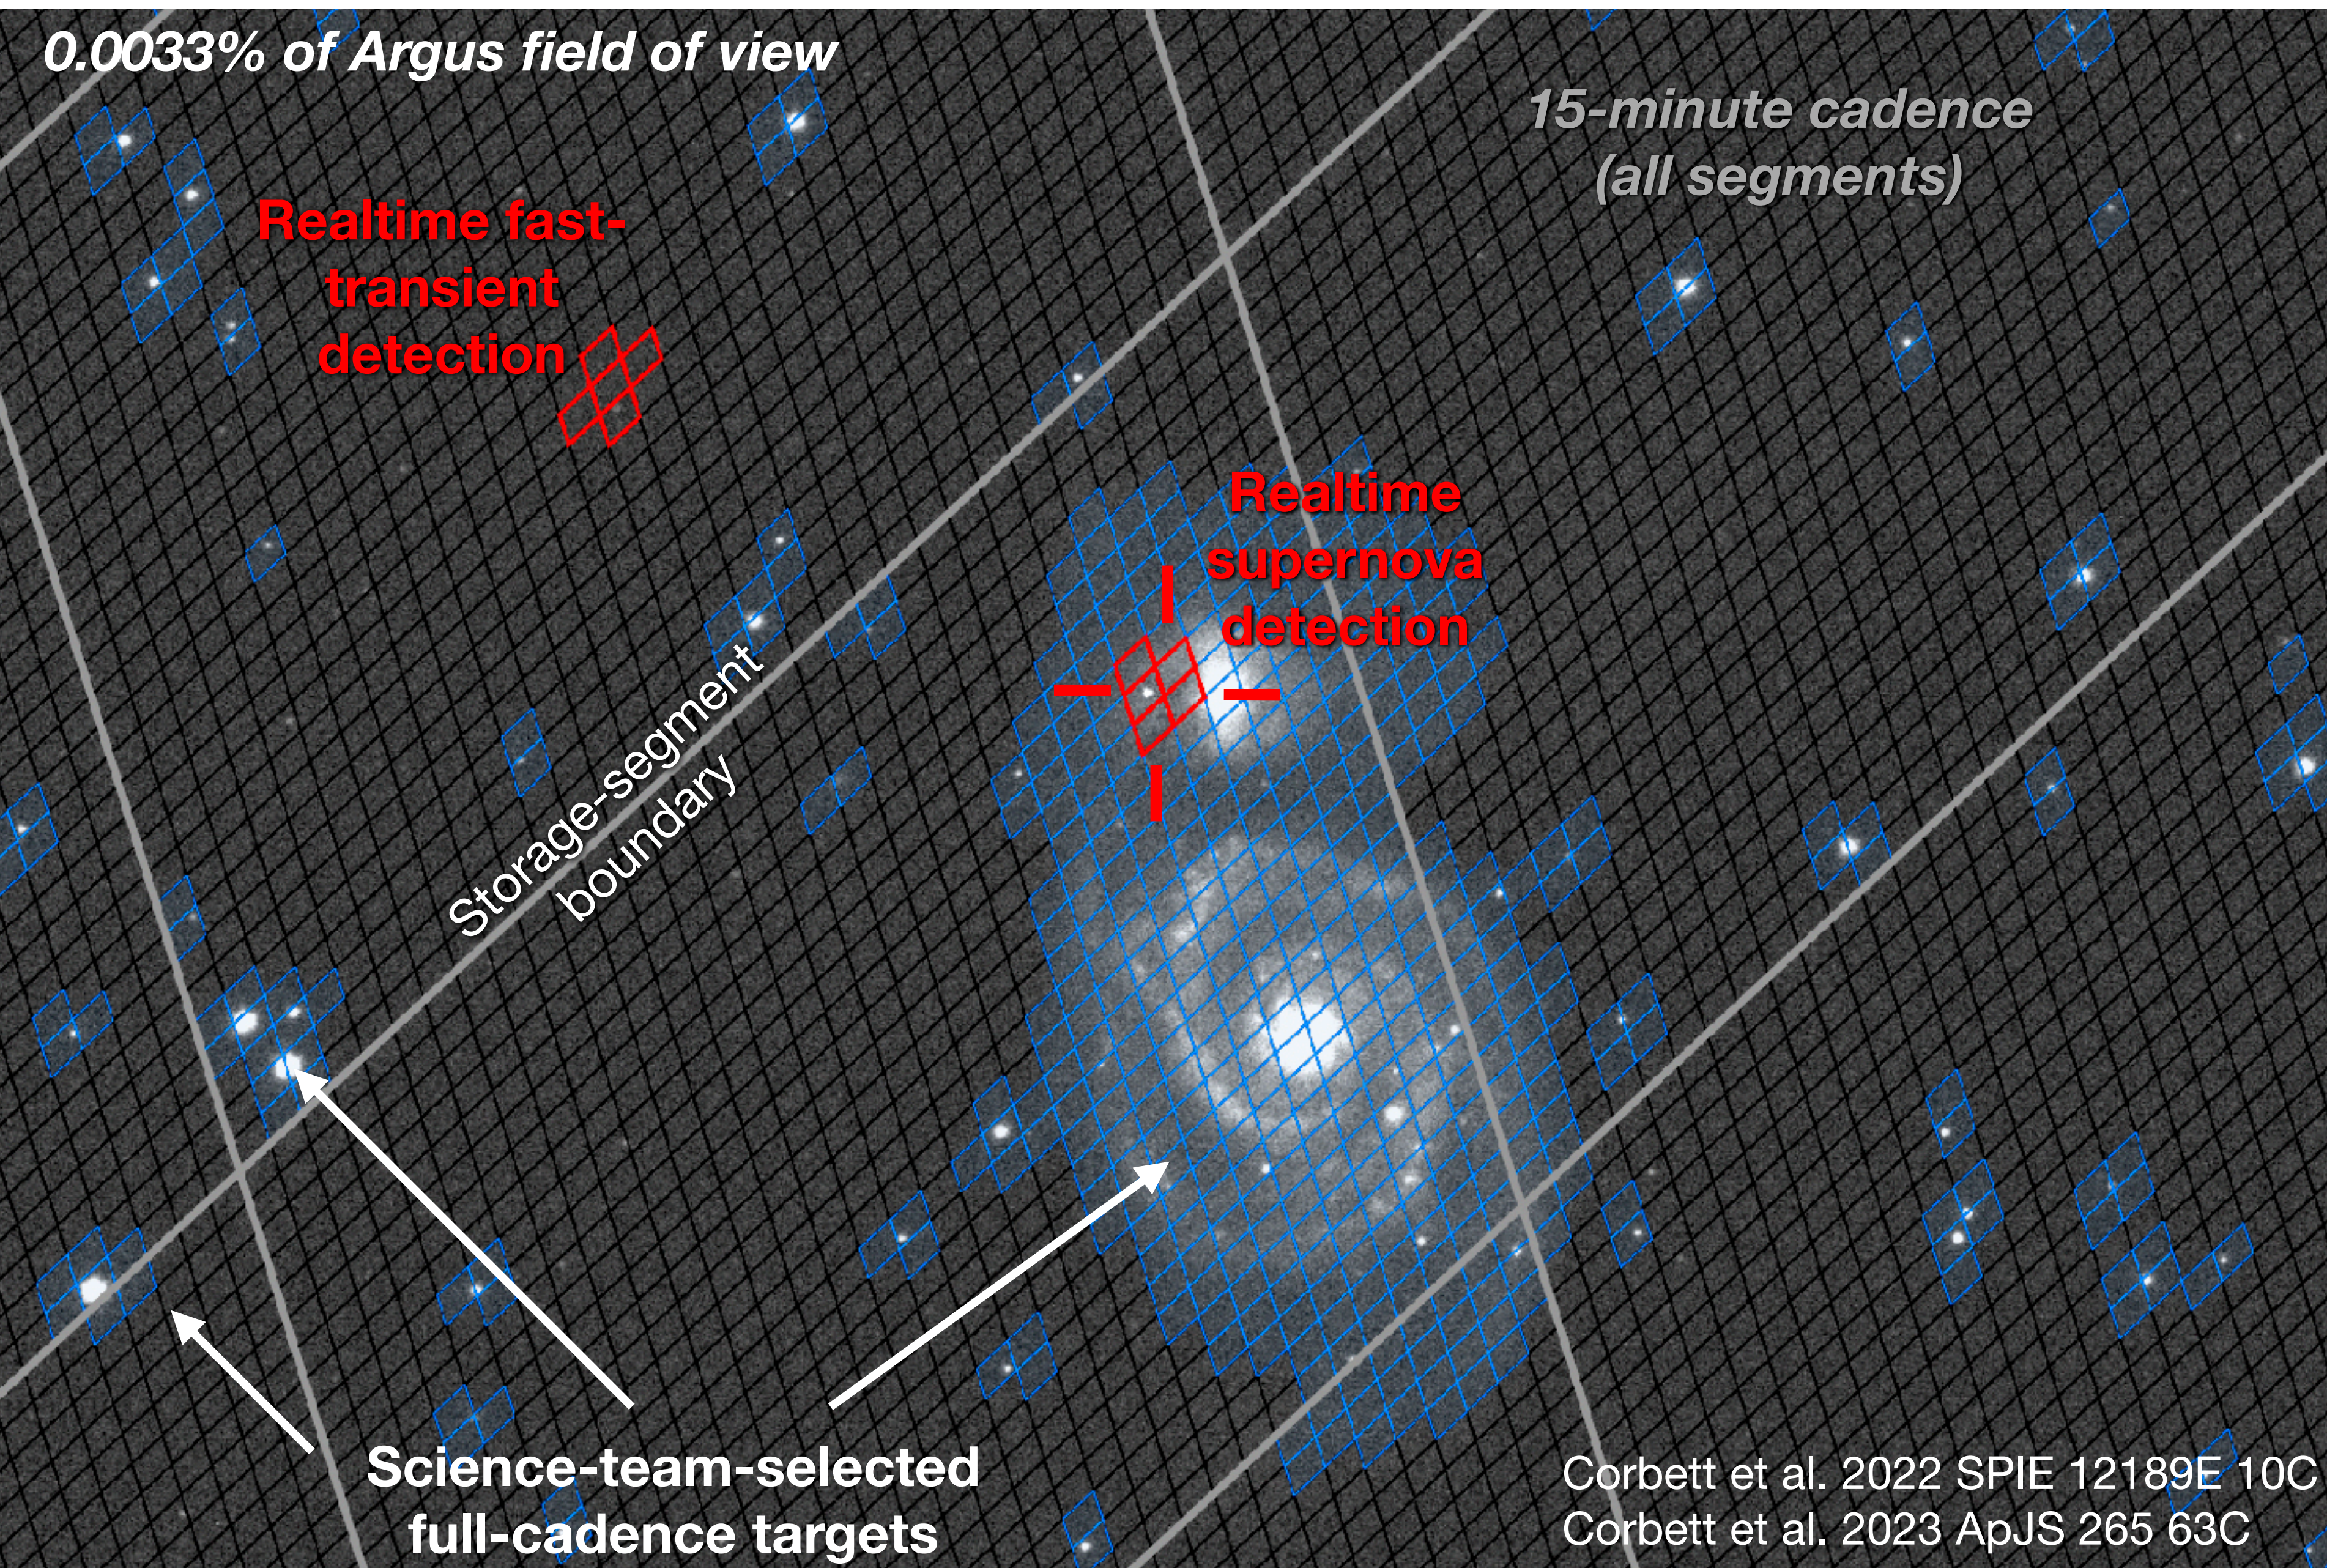

(Law+SPIE) "The inside-out, upside-down telescope: the Argus Array's new pseudofocal design"

# Argus segmented data analysis

## Early calibration and image segmentation used for:

1. Storage downselect (~99% reduction)
  - a. 'Minipix' flagged by AST or Pipeline
2. Analysis unit of work
  - a. Image subtraction
  - b. Photometry
  - c. Coaddition

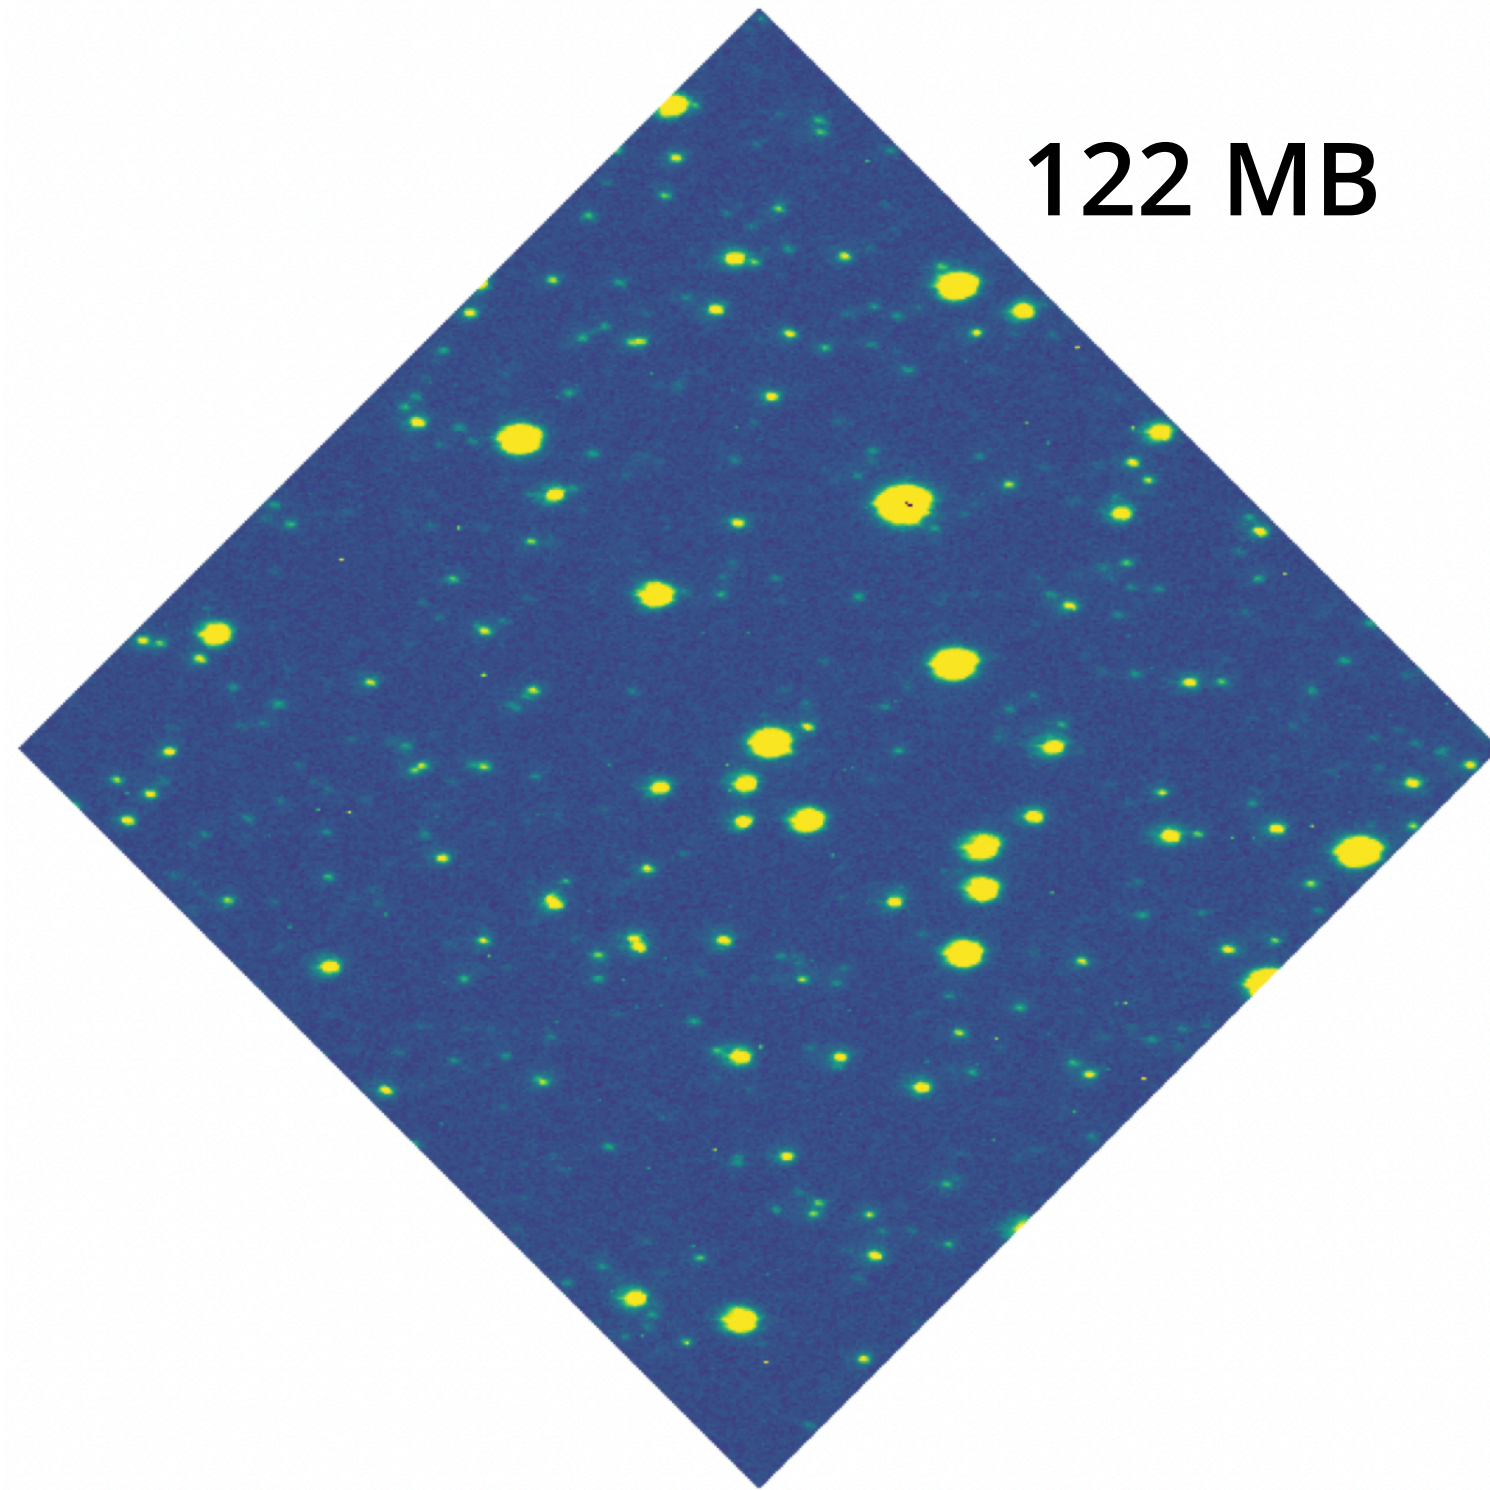

# Compression Rates from Stamping

Segmented  
Full-Resolution Image

122 MB

Local cache (~5 days)  
Science Team Access

Sparse  
Full-Resolution Image

~1.5 MB GZip

Long-term archiving and distribution (public!)  
And full-resolution coadds (15-minutes+ cadence)

Filled  
Low-Resolution Image

~5 MB GZip

Argus mission: **public data infrastructure**

All long-term-storage Argus data products will be made public:

1. Transients and variables event stream (through community brokers)
2. 15-minute-cadence 8,000 sq. deg. images
3. Postage-stamp high-cadence targets
4. Light curves

Public accessibility via programmatic interface

## Why join the science team?

- Select high-cadence targets and survey strategy
- ToO-style access to full-data cache
