

CFT: Algebraic, Topological and probabilistic approaches in Conformal Field Theory

lundi 22 septembre 2025 - vendredi 17 octobre 2025

Institut Pascal

Programme Scientifique

First and second week :

The focus will be given to Probabilistic and Analytic approaches to correlators, mixed with Algebra and Representation theory of VOAs.

Third and fourth week :

The focus will be given to Categorical and Topological approaches.

Third week :

A more intense schedule is expected to maximize the overlap between experts (including junior scientists) from different areas.

Probabilistic approach to correlation functions in CFT
