RAPAS

mardi 21 octobre 2025 16:20 (20 minutes)

Thanks to the support of Paris Observatory, RAPAS build a french amateur network equipped with Gaia like filters and with prototypes of spectrograph to deliver photometric monitoring and SED on alerts. We intend to develop on an international scale this network. Therefore we have to implement a pipeline to provide data to the scientific community.

Orateur: MIDAVAINÉ, Thierry (SAF)
