2023-2025: Master in High Energy Physics

Oct. 2025: PhD in Flavor  
Physics with MÉRIL REBOUD

# My Research

I work on the parameterization of pion form factors. If you wanna know more, catch me in the coffee break 😊

The background is a light cream color with various blue decorative elements. There are several overlapping circles of different shades of blue. Some circles are solid, while others are hollow rings. There are also clusters of small blue dots, some arranged in a semi-circle. The overall aesthetic is clean and modern.

Thank you
