

StratusLab Integration Meeting

ID de Contribution: 1

Type: **Non spécifié**

Preparation

lundi 23 mai 2011 14:00 (30 minutes)

The meeting will be structured as three half day blocks starting with a quick planning meeting and concluding with a quick get together/demo/retrospective. Each block will run breakout sessions where people will work in pairs or small groups on specific topics.

Here are the proposed topics for the :

- Tutorial(s) (do we have more than one and if we do which ones) - e.g. end-user client, sysadmin
- Documentation (architecture, per service pages, finding information quickly)
- Market-Place query feature feedback
- Market-Place installation (Quattor and stratus-install), documentation, tutorial
- Registration page (Quattor and stratus-install), documentation, tutorial
- iSCSI / file systems (Quattor and stratus-install), documentation, tutorial
- Release notes
- Hudson structure
- Creating new jobs / adding new tests to Tester component
- Website (front-page, other pages)
- Streamline deployment procedure (what can we do to make deployment easier? How can we improve deployment procedures?)
- Clean-up appliance repo
