LAL Tasks

lundi 16 mai 2011 14:30 (20 minutes)

 STRATUSLAB-474: (CL) Build flakiness wrt yum repository. (Yum repositories for both Fedora 14 and CentOS 5 exist. They are now rebuilt every 2 minutes and use rsync to update the visible repositories, avoiding whole scale changes to the repositories.) STRATUSLAB-510: (CL) Registration service should allow the use of hashed passwords. (See screenshot. The service now uses exclusively SSHA hashed passwords. This is one of the standard hashing formats used by LDAP and is compatible with nearly all LDAP clients.) STRATUSLAB-518: (CL) Certificate DNs in LDAP. (See screenshot. Registration service now manages the certificate DN information of a user in the 'seeAlso' attribute. This must be manually added by the user.) STRATUSLAB-533: (CL) StratusLab software builds on Fedora 14 in hudson. (See Fedora 14 tasks in hudson view.)

STRATUSLAB-534: (MA) Full tutorial as a system test.

STRATUSLAB-489: (GP) Configuration of Claudia with Quattor. STRATUSLAB-490: (GP) Installation of Claudia with Quattor. STRATUSLAB-434: (GP) Installation and configuration of Claudia with Quattor. STRATUSLAB-532: (GT) Installation of Fedora 14 with Quattor.

Orateurs: Dr LOOMIS, Charles (LAL-Orsay); TEZIER, Gabriel (CNRS/LAL); M. PHILIPPON, Guillaume (LAL - CNRS); Dr AIRAJ, Mohammed (CNRS/LAL)

Unimplemented Tasks

lundi 16 mai 2011 14:00 (10 minutes)

<p> LAL: STRATUSLAB-483: (CL) Use of LVM and iSCSI for machine images. (Lack of time to complete.) STRATUSLAB-513: (CL) Validation of Claudia authentication proxy. (Lack of time to complete.) STRATUSLAB-519: (CL) Use of certificate DN information from registration for authentication. (Problem with default permissions of ApacheDS LDAP server; need more time to find correct LDAP authorization permissions.) STRATUSLAB-531: (CL) Fedora 14 VM image for builds. (Low priority as physical machines with Fedora 14 are now available.) STRATUSLAB-537: (GP) Full Quattor install of StratusLab on Fedora 14 (lack of time -fedora14 on quattor arrived to late-). STRATUSLAB-514: (GP) Verification that Quattor-installed Claudia runs. (just need to add HelloWorld script) STRATUSLAB-536: (MA) Update of benchmarks for current client; automated execution.(need a fix MPI in the RPM package) <p> <p> SixSq: STRATUSLAB-438: Upgrade CLI and Web Monitor to include this error info STRATUSLAB-427: As a Slip-Stream user I can have multi-machine deployment created using StratusLab STRATUSLAB-522: Integrate Registration Web Application with StratusLab (stratus-install), including LDAP STRATUSLAB-523: Define default for policy for stratus-install <p> <p> GRNET: STRATUSLAB-432 : As a StratusLab user I can instantiate VMs with private and local IPs in the reference infrastructure <p> <p> IBCP: STRATUSLAB-313 : As a bioinformatics user, I can deploy a bioinformatics appliance with pre-defined bioinformatics applications. <p> <p> UCM: STRATUSLAB-452: Backport StratusLab patches to OpenNebula mainstream fix argument mismatch fix - kvm - startup - cmd - redhat : Needsupdateofkvmrcfiletopointtoemulatorpath. STRATUSLAB - 547 : OpenNebula2.2doesn'tlogcriticalerrormessage TCD : STRATUSLAB-470 : MarketPlaceshouldgivemoreinfowith400errorcode,insteadofgenericmessage : BadRequest

SixSq

lundi 16 mai 2011 14:10 (20 minutes)

 STRATUSLAB-415: Expose vmStartTimeout as CLI parameter.

 STRATUSLAB-487: Fix manual installation of the StratusLab cloud system

 STRATUSLAB-499: client tools should prompt for password when missing

 STRATUSLAB-512: `tmquarantine.shhangson'sudo...detach - persistent - disk.sh' </li>`

 STRATUSLAB-545: modify "stratus-install -n" for Fedora Nodes

 STRATUSLAB-548: stratuslab-cloud-proxy RPM should conflict with jetty

Orateurs: KONSTANTIN; MEB
