

Séminaire du Laboratoire de l'Accélérateur Linéaire

Walter Wuensch

CERN

Vendredi 27 Novembre 2015 à 11 :00

High-gradient RF development and applications

Significant progress has been made by the CLIC study to increase achievable gradient in normal-conducting accelerating structures. Scientific and technological highlights from the CLIC high-gradient program are presented along with on-going developments and future plans. I will also give an overview of the range of applications that may benefit from high-frequency and high-gradient accelerating technology.

Salle 101 du LAL - Bât. 200, Orsay

Thé et café seront servis 5 mn avant le séminaire

Responsable : N. Delerue (seminaires@lal.in2p3.fr)- <http://www.lal.in2p3.fr>
