Using Narval for the DAQ of the WaveCatcher for GASPARD

jeudi 8 février 2018 16:50 (25 minutes)

After a quick description & history of DCOD (Narval+ENX, next generation) acquisition & slow control system, we will address its application to GASPARD/Wavecatcher, how it helps addressing the increasing of channel and data throughput, how it integrates within various experimental setup. We will also address how it eased the reuse of CORTO setup for GASPARD/Wavecatcher
