Applications of the numerical conformal bootstrap

mercredi 5 mai 2021 15:00 (1 heure)

I'll discuss various applications of modern numerical bootstrap
methods, focusing primarily on 3d CFTs. Along the way I'll describe
various algorithms and software tools that have been recently
introduced to help tackle large-scale bootstrap problems.

Orateur: POLAND, David (Yale University)

Classification de thématique: 1. Status of the conformal bootstrap
