**Instruction to connect to Lyon MCU**

The MCU IP address : IP : 193.48.95.69

I think you'd better use a Polycom (or Tandberg) equipment H323 compatible,  
not a laptop for video-conferencing.

1- You have to call the MCU at Lyon at the IP address 193.48.95.69 at 384  
KBits/second

2- Use the remote control unit (RC) to select the conference and enter the  
PIN code :

- 2.a : press the 'REMOTE' button on your RC unit  
----> actions on the RC unit will be send to the MCU
- 2.b : you can use the navigation keys (Up/down arrow keys)  
to go through the videconf list
- 2.c : right arrow key to select the conference "BAORADIO"
- 2.d : you have to enter the PIN code which is 2065 for our conference  
Use the (\*) or (#) key to enter your pin code  
after the first (#) or (\*) key , a numeric keypad should appear on the screen.  
Use the numeric keys on your RC unit  
finish by pushing the # key : #2065#

3- You should be connected to the video-conference

Use the 'LOCAL' key on your RC unit, to come back to normal  
operation mode, where the RC unit controls the local equipment

**IF YOU CANNOT FIND THE "REMOTE" BUTTON ON YOUR RC UNIT, THEN :**

1- You have to call the MCU at Lyon at the IP address 193.48.95.69  
at 384 KBits/second

2- press the # key  
--->a numeric keypad should appear on the screen

3- enter the number "20213" followed by a # key  
--->This is the "Identifiant numerique : 20213 (terminer par #)"

4- enter the number "2065" followed by a # key  
--->This is the "Code PIN : 2065 (terminer par #)"

SUMMARY : 193.48.95.69 then #15470#0502#

5- You should be connected to the video-conference

We should probably be in IN2P3-LAL4 videoConference room, where you can reach us  
on normal through the telephon : + 33 1 64 46 82 81
