How to explain the success in scikit-learn and how to make it last

mercredi 27 avril 2022 10:00 (30 minutes)

The scikit-learn software has now been cited more than 50000 times in 10 years. It's the most used software by machine learning experts on kaggle. One considers that about 2 millions of data scientists are using it every month. Yet this was made possible with limited resources and mostly by researchers and engineers in academia. In this talk I will first list the reasons that can explain this immense success.

Then I will review some recent efforts in the team in order to keep scikit-learn a leading software in the field.

Orateur: GRAMFORT, Alexandre (INRIA)

Classification de Session: AI and physics conference
