

PROF. DR. RANDOLF POHL

STRONG-2020 PUBLIC LECTURE SERIES
16th December, 15:00
HOW BIG IS THE PROTON?

THIS PROJECT HAS RECEIVED FUNDING FROM THE EUROPEAN UNION'S HORIZON 2020 RESEARCH AND INNOVATION PROGRAMME UNDER GRANT AGREEMENT NO 824093

www.youtube.com/watch?v=C5B_ZfGy4d0

The proton was discovered 100 years ago, but there is still mystery about some of its basic properties: the proton size has been a puzzle for more than a decade now, after various precision experiments produced incompatible results. The two speakers played a central role in these experiments and will explain the origin story of the puzzle and the current state of attempts to solve it.

PROF. DR. JAN C. BERNAUER
