Constraining cosmological models with the effective field theory of large-scale structures

Wednesday, January 18, 2023 5:10 PM (20 minutes)

In this talk, I will present the paradigm of the effective field theory of large-scale structures (EFTofLSS) and how it can be used to constrain cosmological models. First I will discuss the consistency of this theory and its predictive power within the Λ CDM model, and then I will present the constraints of the EFTofLSS applied to BOSS and eBOSS data on some alternative cosmological models.

Presenter: SIMON, Théo (Montpellier Universe and Particles Laboratory - CNRS)
