Observational evidence for disks winds and their properties (chair: Bacciotti) (09:30 - 14:35)

time	[id] title	presenter
09:30	[105] Dougados : Spatially resolved evidence of disk winds	
10:05	[106] Nisini (JWST observations of the HH46-47 system)	
10:25	[107] Whelan (spectro-astrometry of jets and winds)	
10:45	[108] Coffee	
11:15	[109] Flores (optical spectroimaging of the atomic component)	
11:35	[110] Lopez-Velazquez (multiple shells in the HH30 molecular outflow with ALMA)	
11:55	[111] Bacciotti (the layered HL Tau outflow seen with ALMA)	
12:15	[112] open discussion	
14:00	[113] Banzatti (spectral signatures of low-velocity disk winds)
