

AG du Pôle Ingénierie

AGATA Project

Développement Logiciel à IJCLab

Présenté par : **Souhir ELLOUMI**

Advanced Gamma Tracking Array

Intégration d'une nouvelle électronique

Pace_Stare

Dans la chaîne
d'acquisition
AGATA phase 2

- Impact pour la back pressure soft
- Affichage incorrecte de l'utilisation des buffers

Réussir de gérer l'envoi de messages start/stop vers l'électronique via IPBus en fonction de l'occupation des buffers

1. Utilisation de la nouvelle version de TM pour les bancs de tests à Orsay
2. Tester le nouveaux TM à Legnaro, afin d'avoir un retour utilisateur
3. Amélioration des fichiers de configuration PACE/STARE

Merci pour votre attention
